RODUCT: THE GHOST HOOK (Electromagnetic Connective System)

Description: The Ghost Hook is the non-invasive mounting backbone of the Meta-Guinea-Ghost-Ltd ecosystem. Utilizing a proprietary "Electromagnetic Velcro" handshake, it allows heavy-tier hardware to be secured to trees, pillars, and lampposts without tools, drilling, or structural damage.

- **Humanitarian Impact:** Enables "Zero-Permit" rapid deployment. Infrastructure can be set up in hours to support emergency zones, student safety areas, or displaced populations without bureaucratic delays.

- **Tech Logic:** Weather-proof, vibration-resistant, and secure. Removal is only possible via authorized digital handshake through the **Birds-I-view** dashboard.

PRODUCT: THE GHOST BRICK (Universal Power & Data Link)

Description: The Ghost Brick is the universal modular engine for all Meta-Guinea-Ghost-Ltd products. It acts as the bridge between power storage and the user interface, allowing for infinite scalability of the Sanctuary Hub.

- **Ecosystem Integration:** * **Power Expansion:** Snaps into the **Dragon Ghost Power Bank** to double or triple energy reserves instantly.
    - **Visual Interface:** Provides the power and data handshake to drive the **Ghost Roll-Flexi Screen (#4)**.

    - **Wearables:** Functions as the power-core for the **Ghost Skin** line, allowing for lightweight, high-performance wearable tech.

- **Humanitarian Impact:** Facilitates "Incremental Growth." Communities can start with basic utility and "snap in" more power or screens as budgets and needs expand.
